Segment Software Version Description

Netscape Messaging Server (NSMSG)
Version 1.0.0.0/3.01 (Windows NT 4.0)

December 9, 1997

Table of Contents

Preface

The following conventions are used in this document:

Bold	Used for information that is typed, pressed, or selected in executables and instructions. For example, select **connect to host**.
Italics	Used for file names, directories, scripts, commands, user IDs, document names, and Bibliography references; and any unusual computerese the first time it is used in text.
<u>Underline</u>	Used for emphasis.
Arrows <>	Used to identify keys on the keyboard. For example <Return>.
"Quotation Marks"	Used to identify informal, computer-generated queries and reports, or coined names; and to clarify a term when it appears for the first time. For example "Data-Generation Report."
`Courier Font`	Used to denote anything as it appears on the screen or command lines. For example `tar xvf dev/rmt/3mm`.
Capitalization	Used to identify keys, screen icons, screen buttons, field, and menu names.

1. Software Version Description

1.1 Scope

This Software Version Description (SVD) contains a description of the Netscape Messaging Server (NSMSG) segment for the Defense Information Infrastructure (DII) for Windows NT-based machines.

1.1.1 Identification

Segment Name:	Netscape Messaging Server
Segment Type:	COTS
Prefix:	NSMSG
Home Directory:	*C:/h/COTS/NSMSG*
Required License:	Netscape Messaging Server License
Version Number:	1.0.0.0/3.01
Platform:	Intel PC/Windows NT 4.0

1.1.2 System Overview

Purpose:	NSMSG manages e-mail messages based on an open architecture.
Usage:	NSMSG can be used to deliver e-mail and messages, provide remote connectivity, deliver automatic responses, perform automatic building of mailing lists, and can function as an LDAP client to leverage a shared repository for user, group, and other directory style data.
References:	"Netscape Messaging Server - Administrator's Guide (NT)" from Netscape Communications Corporation (accompanies each licensed copy of the Netscape Messaging Server). On-line documentation accompanies the software, and additional documentation can be downloaded from Netscape at *http://www.netscape.com/*.

1.1.3 Product Information

Product Qualification:	NSMSG has been approved for delivery by the DII Engineering office.
Product Restrictions:	DISA purchased a 95,000 person user license for each of the SuiteSpot servers. Thus, as long as fewer than 95,001 users are being served, DISA can deploy an unlimited number of Netscape Messaging Servers. This

product can not be distributed to foreign countries.

Product Dependencies: This segment requires that the Netscape Communicator web browser be present on the system prior to installation.

This segment requires that the commercial off-the-shelf (COTS) product, Netscape Messaging Server, has been installed on the target computer before the actual segment is installed via the COE Installer program. If the incorrect version of Netscape Messaging Server is installed, the installation will terminate.

2. Referenced Documents

This and other segment documentation provides segment description and installation instructions. User administration and usage is provided in the Netscape Messaging Server Administrator's Guide for Windows NT. Further information about this product can be obtained from the Netscape Communications Corporation web site at:

http://search.netscape.com/comprod/server_central/index.html

This page intentionally left blank.

3. Version Description

3.1 Inventory of Material Released

Two 3.5" diskettes comprise the software delivery. One is labeled "1 of 1; master" and the other "1 of 1; backup." Each disk contains NSMSG in "MakeInstall" format. Also included in the delivery are 3.5" floppy disks containing the delivery documentation.

3.2 Inventory of Software Contents

The software delivered is "Messaging Server, Version 3.01" as produced by Netscape Communications Corporation.

3.3 Changes Installed

Not applicable.

3.4 Waivers

The following delivery documents have been waived by the DII Engineering Office: Software Requirements Specification, Database Design Document, System Administrator's Manual, Software User's Manual, Operator's Manual, and Software Test Plan.

3.5 Adaptation Data

Not applicable.

3.6 Installation Instructions

Installation Instructions for this segment are provided in a separate document. The segment requires 13 MB of disk space and 10 MB of RAM.

3.7 Possible Problems and Known Errors

None.

This page intentionally left blank.

4. Notes

None.
